Introduction

As technology continues to develop and grow, the demand for travelling also increases. In the year 1990, there were 439.4 million arrivals in the five continents listed in the chart which are Africa, Middle East, Asia & Pacific, Americas, and Europe. This number has grown to 1.4 billion arrivals in a mere 18-year thanks in part to the technological boom in recent times.

Our travel and currency converter website is created to cater to all travellers or to those who are simply curious on currency and time zone conversion. This website will feature 7 pages which are the homepage, charts page, time zone page, tools page, hyperlinking page, about page, and the language page. It alsol offers multiple tools such as a calculator tool, calendar tool, and a map tool.

Objectives

- To build and design a webpage that can help travellers plan and organize their travels

- To provide a plethora of languages to satisfy most consumers from all around the world

- To provide forex traders with live charts of currency conversion.

Methodology

For this project, we are adopting the Rapid Application Development (RAD). It is a development methodology that emphasizes the fabrication process and evaluation over lengthy development and testing cycles. Some of the advantages of RAD are it saves cost and it is easy to modify.
